

Our exclusive Alpine Select plantation shutter is hand crafted with no detail left unattended. Our shutters will stir up feelings of beauty, sturdiness, style and enjoyment. Our commitment to quality and value will complement the beauty of your home and provide pleasure for decades to come.

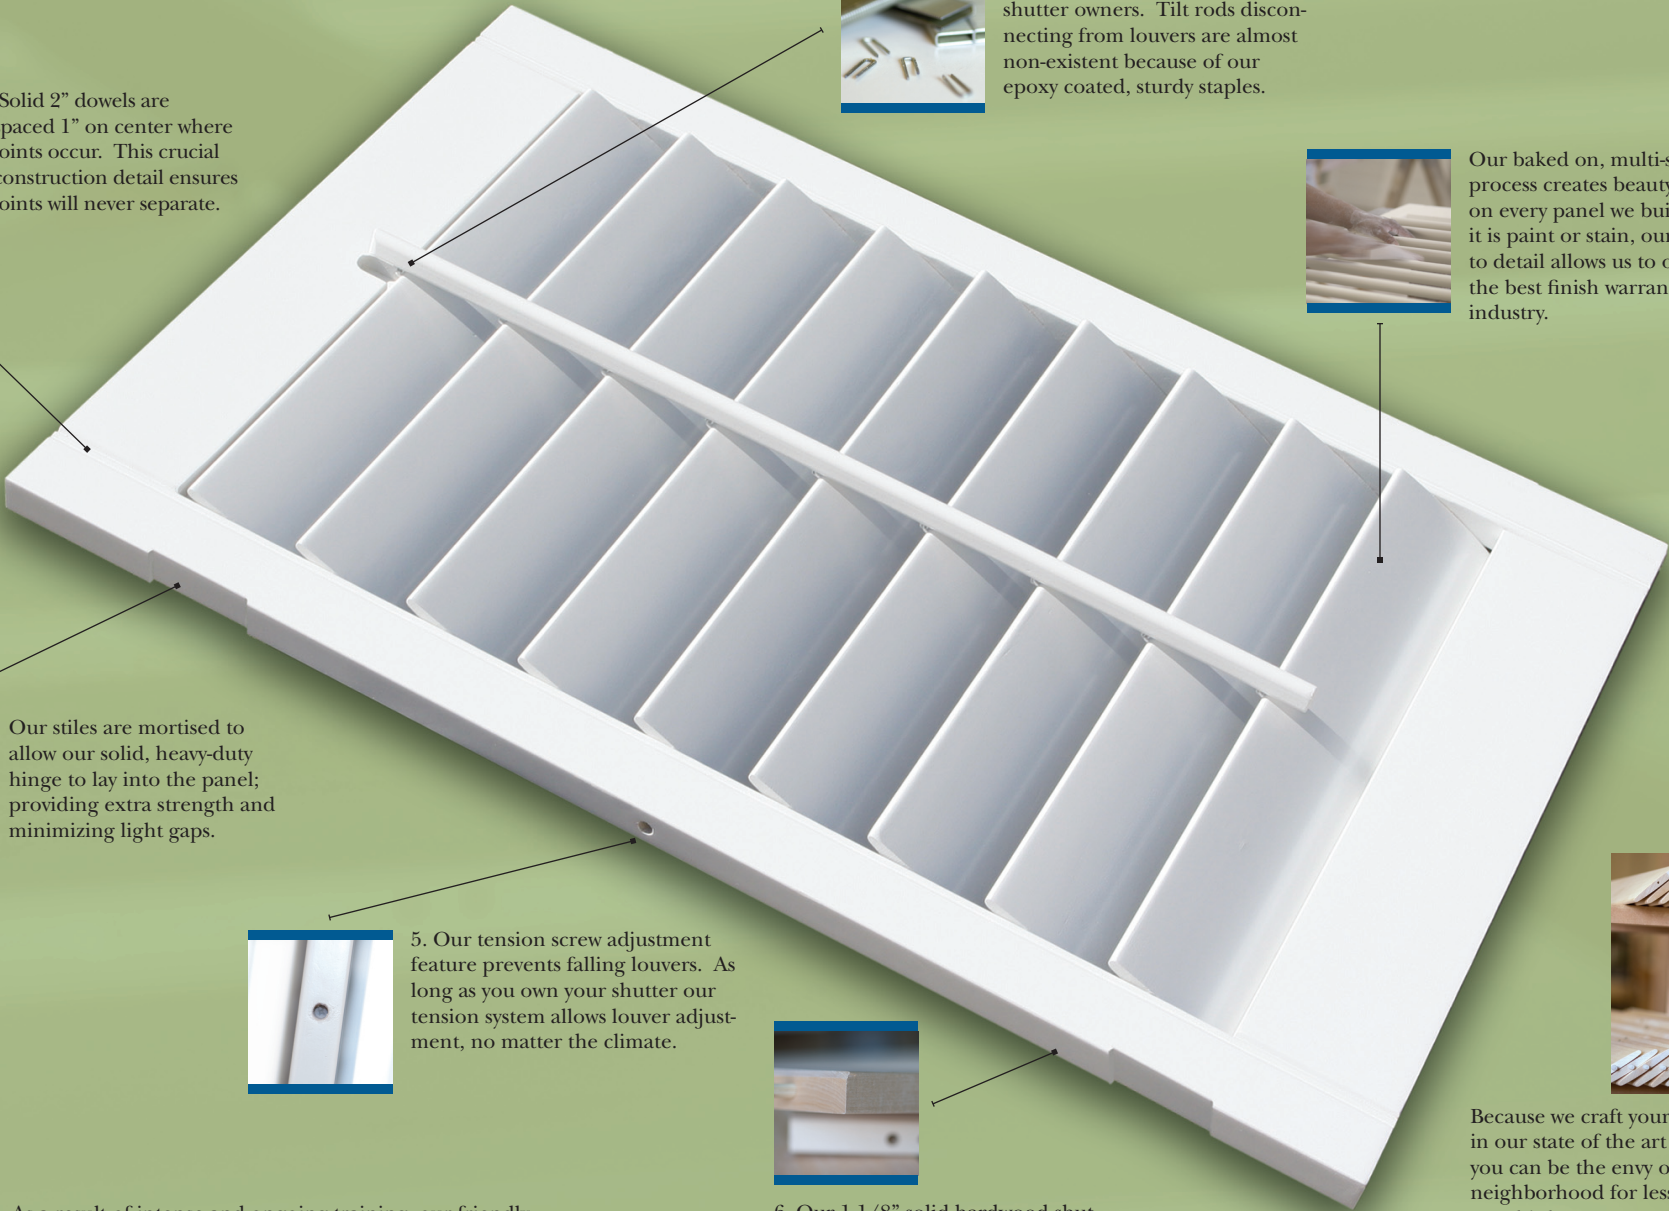

Solid 2" dowels are spaced 1" on center where joints occur. This crucial construction detail ensures joints will never separate.

Our extra long staples solve the most annoying experience for shutter owners. Tilt rods disconnecting from louvers are almost non-existent because of our epoxy coated, sturdy staples.

Our baked on, multi-step finish process creates beauty and lustre on every panel we build. Whether it is paint or stain, our attention to detail allows us to offer one of the best finish warranties in the industry.

Our stiles are mortised to allow our solid, heavy-duty hinge to lay into the panel; providing extra strength and minimizing light gaps.

5. Our tension screw adjustment feature prevents falling louvers. As long as you own your shutter our tension system allows louver adjustment, no matter the climate.

6. Our 1 1/8" solid hardwood shutter provides strength, durability and longevity.

Because we craft your shutters in our state of the art facility, you can be the envy of the neighborhood for less than you think.

As a result of intense and ongoing training, our friendly and skilled installers provide peace of mind in your home. We stress punctuality, courtesy, cleanliness and follow through.
